

One team, one goal.

At **Next Step**, we believe in helping our community by providing the necessary tools to support healthier, more active lives.

We believe in educating our customers on the importance of foot stability and proper foot health.

We also believe the value of a pair of properly made insoles isn't measured in dollars, it's measured by the next steps we take together to inspire activity and change lives.

With more than two decades of pedorthic experience, we've learned to make your goals *our* goals, and we're ready to enter the race together to help you achieve them.

**Take the next step
toward getting back to
what you love to do.**

One step at a time.

The first step toward getting back to what you love to do is a visit to Physicians Footcare.

The *next* step is a visit to a **Next Step** store for professionally-fitted insoles.

You're better when you can walk, run, and play pain free. That's why we strive to provide you with the care and products you need to enjoy a fun, active, and healthier lifestyle.

All **Next Step** personally-fitted insoles are designed to relieve foot pain as well as help with the heel, knee, hip, and back pain often associated with foot instability.

Doctors know they can rely on us to play our part as important members of your total healthcare team. And you can count on us for our expertise, our compassion, and our tireless efforts to relieve your pain and get you back to what you love to do.

A 4th dimension of care.

It may be that one of our Ready-to-Wear **Next Step** brand insoles is perfect for your condition. However, if need be, our labs will custom craft insoles to offer you the maximum benefit.

Our 3D scanning technology measures the exact shape of your feet to ensure we fully understand what it will take to craft a custom insole exclusively for you.

However, we've transformed the current state-of-the-art 3D technology into a unique 4D experience by adding a single essential factor: our Certified Pedorthists.

THE 4D EXPERIENCE | ONLY AT NEXT STEP

The only way to truly turn what's "virtual" into "reality" is with the personal care and expertise a **Next Step** Certified Pedorthist can provide.

Anyone can scan a foot. And anyone can fabricate a custom insole. But only a **Next Step** Certified Pedorthist can bridge the gap between the digital world and the practical, physical world through one-on-one evaluations and fittings, bio-mechanics experience, and the human drive to get you back to pain-free living.

4D
EXPERIENCE

*Custom or pre-formed, **Next Step** Certified Pedorthists are on hand to measure, fit, adjust, modify, or create insoles or other orthotic devices to address your foot and/or lower-limb condition and to alleviate pain.*

Exceptional Shoewear.

Function and fun must always be in perfect harmony. And all of our insoles and shoes are chosen specifically to ensure such harmony in your everyday life.

We know the perfect pair of insoles requires the perfect shoe. That's why we carefully select specific shoes that pair perfectly with our insoles to ensure the best results for you.

We carry the top brand names you (and we!) know and trust. Names like:

BROOKS

APEX

ROCKPORT

new balance

Florsheim
SHOE COMPANY

aetrex

Other brand names we carry include:

- Vionic
- Dunham
- Revere
- Aravon
- Finn Comfort
- Special orders, too

Plus, we also offer a full line of Diabetic Care Shoes by Anodyne, Apex, Dr. Comfort, and New Balance.

Athletic shoes. Work shoes. Comfort and leisure shoes. We have just the right shoe to fit every part of your life *and* style.
